

# Publish: Functions Related to Publish Information

## Property

---

## Functions

---

afx\_msg VARIANT **OSPropertyUI::GetPublishedProfileName** (LPCTSTR strSTAADName, const VARIANT FAR \*varnCountry)  
Get project published name by STAAD profile name.

afx\_msg VARIANT **OSPropertyUI::GetSTAADProfileName** (LPCTSTR strPublishedName, const VARIANT FAR \*varnCountry)  
Gets STAAD profile name by published profile name.

---

## Detailed Description

---

These functions are related to publish.

## Function Documentation

---

### ◆ GetPublishedProfileName()

```
VARIANT OSPropertyUI::GetPublishedProfileName ( LPCTSTR strSTAADName,  
                                              const VARIANT FAR & varnCountry )
```

Get project published name by STAAD profile name.

### Parameters

[in] **strSTAADName** STAAD profile name(Type: string)

[in] **varnCountry** The value for the specified country(Type: long/Integer), refer  
[OSPropertyUI::CreateBeamPropertyFromTable](#)

### Return values

<BSTR> Published profile name

**NULL** Unable to find any equivalent published name corresponding to STAAD profile name  
**strSTAADName**.

### C++ Syntax

```
// Get published profile name of "STAADProfile1" - American.  
VARIANT PublishProfileName =  
    OSPropertyUI::GetPublishedProfileName((LPCTSTR)"STAADProfile1", 1);
```

### VBA Syntax

```
' Get published profile name of "STAADProfile1" - American.  
Dim RetVal As VARIANT = OSPropertyUI.GetPublishedProfileName("STAADProfile1", 1);
```

### ◆ [GetSTAADProfileName\(\)](#)

```
VARIANT OSPropertyUI::GetSTAADProfileName ( LPCTSTR strPublishedName,
                                             const VARIANT FAR & varnCountry )
```

Gets STAAD profile name by published profile name.

### Parameters

[in] **strPublishedName** Published profile name(Type: string)

[in] **varnCountry** The value for the specified country(Type: long/Integer), refer  
[OSPropertyUI::CreateBeamPropertyFromTable](#)

### Return values

<BSTR> STAAD profile name

NULL Unable to find any equivalent STAAD name corresponding to profile name **strPublishedName**.

### C++ Syntax

```
// Get STAAD profile name of "PublishedProfile1" - American.  
VARIANT STAADProfileName =  
    OSPropertyUI::GetSTAADProfileName((LPCTSTR)"PublishedProfile1", 1);
```

### VBA Syntax

```
' Get STAAD profile name of "PublishedProfile1" - American.  
Dim RetVal As VARIANT = OSPropertyUI.GetSTAADProfileName("PublishedProfile1", 1);
```
